

New Baptist Hospital Construction Update

April 2023

We are excited to be moving to the new Baptist Hospital campus on Brent Lane later this year. But we know it's the people inside who make the difference in providing the high-quality care our community expects from us. Our dedicated team has brought lifesaving innovations to our community and set the standard for excellence in heart care, stroke care, joint replacements and more. That level of outstanding care will be right at home on the new campus.

New and current team members will enjoy a world-class environment with an abundance of amenities. Here are a few:

- Expansive windows throughout the buildings will offer beautiful vistas of the outdoors. Specially designed lightwells bring landscape views and natural light into the emergency room, imaging, surgery and the Baptist Heart & Vascular Institute.
- The Town Square will offer a peaceful, inspirational place to enjoy lunch or take a break amid ages-old heritage oak trees, carefully landscaped walking paths, water features and more.
- A pizza oven in The Bistro Café is predicted to be a team member favorite as a complement to the wide variety of hot meals and grab-and-go food options available there. Panera Bread in the Bear Family Foundation Health Center will serve an array of customer favorites and specialty coffees.
- Dedicated building entrances and elevators for team members will enhance efficiency. Parking will be secure and well-lighted.

Much of the construction work all across campus, such as the installation of elevators, flooring and cabinetry, is nearly complete. Installation of some of the decorative elements of the buildings is now underway, including wood ceilings and wall panels, pendant light fixtures and the glass handrail of the monumental staircase in the hospital's main lobby. The importance of every detail of our new home grows every day because we know those features will enhance the quality of life for every patient and every team member who walks through our doors.
